

OPERATING AND DISPLAY ENCLOSURES

A Phoenix Mecano Company

ROSE Systemtechnik GmbH

The company was founded in 1969 and specializes in the development and production of high quality industrial enclosures, which are used in a variety of environmental conditions.

Phoenix Mecano AG / Switzerland is a global company.

The basis of our business success are systems from a wide range of high quality products, innovative design and first class customer service.

More enclosure systems for operating and display areas see Handheld enclosures or Stainless steel enclosure catalogues.

Applications

- Polyamide handheld enclosure for MCR, automation technology and data acquisition
- 2 sizes - 270 x 248 x 64 mm to 311 x 281 x 72 mm
- Large fitting area
- For installations and command devices mobile and stationary applicable
- Variable mounting depths

Included in delivery:

Double skinned enclosure with base and top, with fixing areas incl. seals and border profile, 3 cover flaps for interface garages, screws and fixing materials for front panel mounting.

Technical data

Material:

Enclosure: polyamide

Border profile: NBR, black

Colour:

Profile info:

- All profiles can be combined with one another
- Profiles can be attached with fixed or hinged connections.
- If straight profile side (see example 2) the rear panel can also be designed as a door.
- The max. mounting depth in the case of operational enclosures is 675 mm (Profile 4 + 2 + 2 + 4)
- The max. mounting depth with console attached is 425 mm (Profile 4 + 4)
- The max. enclosure size is limited by the front plate to 1000 x 1000 mm

Applications

- Climatic systems for ROSE Commander systems, co-ordinated with the application
- Filter ventilators upto 25 m³/h discharge flow
- Compressor cooling systems upto 430 W cooling capacity
- Peltier cooling elements upto 150 W cooling capacity

Included in delivery:

Climatic system depending upon execution completely Commander system

Heat management

Operating and control systems need an enclosure system, which makes an optimal handling possible for the accommodation at the machine in the production process. ROSE offers for this special commander systems. These operating and control systems, usually realized on PC basis, produce a thermal power loss. For the avoidance of the loss of the devices or components and for the securing of the production process air conditioning is necessary. Rose offers here a complete aligned cooling system. With additional heat sinks up to the modern Peltier cooling systems - all options are possible.

For all our Commander systems we offer particularly devised cooling systems to you:

Passive cooling with heat sink rear walls

Active cooling with filter ventilator systems

Active cooling with compressor cooling systems

Active cooling with peltier cooling elements

Filter ventilators with snatching assembly

Application and function

for the ventilation of cabinets, operating and control enclosures.

Two versions: for the electrical connection at 24 V DC and to 230 V AC.

The simple assembly takes place by cutout in door, side wall, rear wall or roof of the enclosure.

Advantages

Generally high protection classification (IP 54) by fin mounting.

Short assembly time by simple snatching assembly.

The ventilator used has UL-, CSA-, VDE- and CE-approvals.

Mini cooling systems in compressor technology

Application an function

for the active cooling of cabinets, operating and control enclosures. The simple assembly takes place by cutout in rear wall of the enclosure.

Advantages

This new generation of mini cooling systems provides maximum cooling with minimal space requirements. The maintenance-free cooling systems with 200 to 450 W are designed to operate without filters.

The heat exchanger condenser profile has been optimized using wide aluminium fins and improved air in- and outlets. Collectively, they provide an increased cooling output of 20 %, thus guaranteeing performance for demanding industrial environments.

These mini cooling units can be operated through mini controllers according to operational requirements.

With a depth of only 110 mm the mini cooling units are currently the smallest and most compact built-in mount and side mount units on the market.

Due to the environment there is used the safe refrigerant R134a.

Mini cooling systems in Peltier technology

Application and function:

for the active cooling of cabinets, operating and control enclosures, industrial PC's, monitor and flat screen monitor.

3 types in 50, 100 and 150 W cooling capacity are available.

For the electrical connection at 24 V DC. The simple assembly takes place by cutout in door, side wall, rear wall or roof of the enclosure.

Advantages of

Peltier cooling units:

- compact design
- assembly in each position, because the units work without refrigerants
- high efficiency

The Peltier effect

The Peltier effect is a thermoelectrical procedure, where a semiconductor material is used which is caused with appropriate doting by current guidance the change of the energy state by charge carriers and thus used to the transport of heat.

Computation of the necessary cooling performance:

$$P_k = P_v - k \times A \times T$$

$P_k =$ Necessary cooling performance (W)

$P_v =$ Dissipation loss of built in devices (W)

$k \times A \times T =$ Inner convection of device

$k =$ Thermal transmission coefficient (eg: sheet metal = 5.5 W / m² K)

$A =$ Usable enclosure area (m²)

$\Delta T = T_i - T_a =$ Temperature difference between inner and surrounding temperature

Diecast aluminium, fix version for ground mounting or wall mounting

Order No. **49.47 72 00**

Turnable foot stand with adapter plate

Diecast aluminium with adjustable stop position between machine and control panel

Order No. **49.47 72 20**

Turnable foot stand

Diecast aluminium with adjustable stop position between machine and control panel

Order No. **49.47 72 21**

Console flange 15°
Aluminium

Order No. **49.47 76 00**

Column

Steel, painted, length individually up to 2 m, including adapter plate for GTN II top mounted joint, at bottom side flange outlet

Order No. **49.47 00 04 8** (specify total length)

Inclining adapter GTN II

Order No. **49.47 80 00**

Aluminium profile tube

Extruded aluminium sheath, open version with integrated cable channel with black rubber cover

Order No. and length see page 126

Note: the vertical length of the profile is responsible for the load of the complete suspension system (lever arm!). Further information for this on request. The values in the above load diagram are guilty to an execution hanging or standing. The declarations of weight are a summary from installation weight, Commander and all components and tubes between Commander and angle.

Added system elements

System components

Top-mounted joint

Cast aluminium with steel inner tube and flange mounting.
Swivelling range 250° (cannot be limited or stopped)

Order No. **49.49 66 00**

Adapter flange

Cast steel part for mounting between wall and wall hinge for free cable routing, cable opening top or bottom as required.

Order No. **49.49 79 00**

System components

Wall hinge S (vertical)

Cast aluminium with steel inner tube and flange mounting.
Swivelling range 250° (cannot be limited or stopped)

Order No. **49.49 62 00**

Wall hinge W (horizontal)

Cast aluminium with steel inner tube and flange mounting.
Swivelling range 250° (cannot be limited or stopped)

 Cast aluminium with steel inner tube. Coupling mounted from inside.
 Swivelling range 270° can be stopped at any point via clamping lever (swivelling range cannot be limited)

Order No. **49.49 77 02**

Flange angle coupling GT 48/2 Pro
 for direct mounting of Siemens Pro command units
 Combination of angle and coupling for horizontal tube exit. Cast aluminium with steel inner tube.
 Coupling mounted from inside.
 Swivelling range 270° can be stopped at any point via clamping lever (swivelling range cannot be limited)

Order No. **49.49 78 02**

System components

Adapter plate GT 48/2 Pro
for connecting GT 48/2 elements with Siemens Pro command units
(not relevant for flange coupling GT 48/2 Pro and flange angle coupling GT 48/2 Pro)

Order No. **49.45 00 01**

Console flange
Aluminium incl. screws and seal, fixed inclination 30°.
Screw-mounted between enclosure and coupling.

Order No. **49.49 76 00**

Inclining adapter
Cast aluminium part with bellow and seal, inclination can be adjusted to any angle between 0° and 45°. Screw-mounted between enclosure and coupling.

Order No. **49.49 80 00**

System components

Flat panel adapter

Aluminium profile for rear connection of GT 48/2 / GTK electronic to flat panels. RAL 7035, light grey

Order No. **49.45 90 01**

Load diagram

Note: the vertical length of the profile is responsible for the load of the complete suspension system (lever arm!). Further information for this on request. The values in the above load diagram are guilty to an execution hanging or standing. The declarations of weight are a summary from installation weight, Commander and all components and tubes between Commander and angle.

Added system elements

System components

Top-mounted joint

Cast iron. Fastening and adjustment on suspension tube with olive rings. Permanent easy-running ball bearing. Friction force of swivel movement is adjustable. Easy cable routing thanks to open cable duct. Swivelling range approx. 360°

Order No. **49.90 66 01**

Foot stand/wall flange

Cast iron. Fastening and adjustment on suspension tube with olive rings. Mounting options: Vertical (foot stand), horizontal (fixed wall mounting) or hanging (ceiling mounted). Easy cable routing thanks to open cable duct.

Order No. **49.90 74 01**

System components

Wall hinge

Cast iron. Fastening and adjustment on suspension tube with olive rings. Permanent easy-running ball bearing. Friction force of swivel movement is adjustable. Easy cable routing thanks to open cable duct. Dust protection with woven bellow. Swivelling range approx. 180°

Order No. **49.90 70 01**

Intermediate joint

Cast iron. Fastening and adjustment on suspension tube with olive rings. Permanent easy-running ball bearing. Friction force of swivel movement is adjustable. Easy cable routing thanks to open cable duct. Dust protection with woven bellow. Swivelling range approx. 180°

Order No. **49.90 67 01**

System components

Angle (FH)

Cast iron. 90° angle for use with high bending loads. Fastening and adjustment on suspension tube with olive rings. Additional safety screws for high vertical tensile loads. Easy cable routing thanks to open cable duct.

Order No. **49.90 71 11**

Angle (AS)

Cast aluminium 90° angle for vertical construction from the bottom up with minimal bending load. Fastening and adjustment on suspension tube with olive rings. Easy cable routing thanks to open cable duct.

Order No. **49.90 71 20**

System components

Coupling

Cast aluminium Large surface flange mounting on enclosure. Fastening and adjustment on suspension tube with olive rings. Permanent easy-running ball bearing. Swivel movement friction force can be adjusted with clamping lever. Easy cable routing thanks to open cable duct. Swivelling range approx. 320°

Caution: Custom flange fastening available for extremely heavy duty work!

Order No. **49.90 73 01**

Angle coupling

Cast aluminium. Combination of coupling and angle. Large surface flange mounting on enclosure. Fastening and adjustment on suspension tube with olive rings. Permanent easy-running ball bearing. Swivel movement friction force can be adjusted with clamping lever. Easy cable routing thanks to open cable duct. Swivelling range approx. 320°

Caution: special flange fastening available for extremely heavy duty work!

Order No. **49.90 75 01**

System components

Top-mounting flange

Fitted in combination with coupling or angle coupling to maintain compliance with enclosure rating IP 65 at transition to control panel.

Type A: Cast aluminium Large area mounting on enclosure for maximum 3 ready-made leads with diameters from 7 to 26 mm. Open cable entry.

Type B: Cast aluminium Large area mounting on enclosure for a large number of ready-made leads. Sealed with special cable glands or threaded cable connectors. Open cable entry.

Type A: Order No. **49.90 00 30**

Type B: Order No. **49.90 00 20**

Moterm II

- Mobile stand system for control components
- Version with 4 rollers or with foot stand
- Fixed or height-adjustable version with pneumatic spring
- Optionally foot stand for anchoring

Included in delivery

Moterm with integrated tilt adjustment for adapter plate for control systems
(Please order adapter plate separately)

Technical Data

Material:

Base and stand profile: Aluminium profile system DIN EN 573 EN AW-ALMgSi

Colour:

Base: RAL 9005, black

Stand profile: plain anodised, powder-coated optional

Maximum static load:

80kg

Moterm II

Moterm x11

Version with levelling feet to adjust for floor irregularities – as a stand system
Version with fixed height (966 mm), other height or base dimensions on request

Order No.	Type	Height	Description	Load
50.01 03 11	Moterm 311	1059 mm	fixed height, with foot stand	8 - 80 kg
50.01 09 11	Moterm 911	customized	fixed height, with foot stand	customized

Moterm x12

Version with levelling feet to adjust for floor irregularities – as a stand system
Version with pneumatic spring and release mechanism
Height can be adjusted from 750mm to 1000mm
for load ranges from 8 to 50kg; other load values on request

Order No.	Type	Height	Description	Load
50.01 03 12	Moterm 312	886 mm to 1128 mm	manually adjustable, with food stand	8 - 15 kg

Locking system for version with rollers

Simple adjustment option for height adjustment

Floor attachment with levelling unit (optionally für anchoring)

Inclining adapter

- Inclining adapter for individual connections between enclosure and ROSE suspension systems or for wall mounting
- Simply handling by open design
- Stepped adjuster allows inclination to suit your application

Included in delivery:

Inclining adapter, pre-assembled flange plates, sealings and mounting material

Drilling pattern for Limanda or other enclosures (Order No. 50.02 00 01 to 50.02 00 04)

Inclining adapter

for mounting onto wall or machine

Sheet steel parts for inclined mounting of a Limanda or other enclosure. Two cable exits optionally top or bottom with rubber nozzles. Dust and damp protection by bellow (black).

Enclosure rating IP 54 up to fastening flange.

Swivelling range 180° in 22.5° steps, adjusted with knurled screw.

Order No. **50.02 00 01**

Inclining adapter

Inclining adapter for GT 48/2 (tube)

Sheet steel parts for inclined mounting of a Limanda or other enclosure. Mounted directly onto the circular tube of the GT 48/2 rack system. Fastened to the tube via olive rings (the thread in the circular tube is attached afterwards). Enclosure rating IP 54 once assembled. Dust and damp protection by bellow (black).

Swivelling range 180° in 22.5° steps, adjusted with knurled screw.

Order No. **50.02 00 02**

Inclining adapter for GTK electronic

Sheet steel parts for inclined mounting of a Limanda or other enclosure. Mounted directly onto the connecting tube of the GTK electronic rack system. Flange mounted onto tube with self-tapping screws.

Enclosure rating IP 54 once assembled. Dust and damp protection by bellow (black).

Swivelling range 180° in 22.5° steps, adjusted with knurled screw.

Order No. **50.02 00 03**

Inclining adapter for GT 48/2 / GTK electronic

Sheet steel parts for inclined mounting of a Limanda or other enclosure. Attached to the GT 48/2 or GTK electronic rack system flange coupling with flange plate.
Enclosure rating IP 54 once assembled. Dust and damp protection by bellow (black).
Swivelling range 180° in 22.5° steps, adjusted with knurled screw.

Order No. **50.02 00 04**

Inclining adapter stainless steel

parts for inclined mounting of a Limanda or other enclosure. Attached to the GT 48/2 or GTK electronic rack system flange coupling with flange plate.
Enclosure rating IP 54 once assembled. Dust and damp protection by bellow (black).
Swivelling range 180° in 22.5° steps, adjusted with knurled screw.

Order No. **50.02 10 01**

Inclining adjustment

Continuously variable inclining system (+/- 75°) for Commander systems.
System consisting in aluminium elements with bellow.
Scope of supply: base unit without adaptation plate

Order No. **50.02 01 01**

Inclining adapter

A-DN coupling

Swivelling and inclining coupling for direct connection of enclosures. Dust and damp protection by bellow (black). Enclosure rating IP 65
 Swivelling range 330°
 Inclination range +/- 17°

Order No. **49.85 03 01**

A-DN flange

Cast aluminium part for flange mounting of A-DN coupling, with twist protection, powdered light grey RAL 7035.

Order No. **49.85 05 00**

Mounting of A-DN coupling with two flanges

Mounting of A-DN coupling with one flange

Enclosure selection criteria

Enclosures are generally required to protect the installed equipment from external hazards. These hazards can be varied in nature and are of decisive significance when determining the criteria for the choice of an enclosure.

Essential for appraising whether an enclosure meets safety requirements is a precise definition of the hazards expected at an installation location. The most important conditions to consider are the following:

1. Protection against contact and penetration of foreign bodies
2. Protection against water penetration
3. Protection against internal and external radio interference
4. Chemical resistance
5. Temperature stability
6. Impact resistance
7. Corrosion resistance

Enclosure ratings

ROSE enclosures are classified in enclosure rating in accordance with the generally applicable guidelines contained in EN 60529 and IEC 144.

The enclosure rating is indicated by an abbreviation, which is always composed of the two letters IP and two digits relating to the protection level.

Protection class for contact and foreign bodies protection

First digit	Designation
0	No protection
1	Protection against large foreign bodies
2	Protection against medium-sized foreign bodies
3	Protection against small foreign bodies
4	Protection against granular foreign bodies
5	Protection against dust deposits
6	Protection against dust entry

Water protection class

Second digit	Designation
0	No protection
1	Protection against vertical falling drip water
2	Protection against obliquely falling drip water
3	Protection against water spray
4	Protection against splashing water
5	Protection against water jets
6	Protection when flooded
7	Protection when immersed
8	Protection when submerged

Note: The enclosure ratings given apply to unmodified enclosures as supplied. Wear and tear and temperature fluctuations may lead to a reduction in the enclosure rating.

Temperature stability

The definition of temperature stability for enclosures is based on the maximum continuous temperature at which the enclosure remains dimensionally stable and the enclosure rating remains guaranteed. The permissible brief peak temperatures are often considerably higher.

Corrosion resistance of aluminium enclosures

The corrosion resistance of aluminium enclosures is rated as good, even without special surface treatment. The use of special aluminium alloys with low copper content increases the corrosion resistance.

Additional treatments including

- chromating
 - lacquering (powder coating) and
 - the combination of chromating and lacquering
- further increase corrosion resistance.

We offer the following for critical external areas:

SWB version (seawater-resistant):

Purified - chromated - powder-coated

Standard colour RAL 5009, other colours on request.

For application areas with extreme UV radiation we recommend coating with a special Polyester powder.

SBG/SBGL version only for wet painting processes

SBG = Purified - alodine-primed

SBGL = Purified - alodine-primed - painted

EMV in der Gehäusetechnik

General

In electronic engineering, enclosures are required to fulfil two tasks:

- to protect equipment against external mechanical hazards and radio interference
- to protect the environment against mechanical and electrical hazards or radio interference caused by equipment

Electromagnetic compatibility (EMC) is becoming an increasingly important factor in the choice of enclosures due to sustained advances in the development of electronic components and increased density of components on circuit boards - this being connected with increased emission of electromagnetic radio interference into the environment.

Statutory regulations

EU directive (05.89/336/EWG), issued in May 1989 within the framework of the rationalisation of European standards, came into force in Germany in the EMC act (EMVG) on 9.11.1992.

This act applies to all devices which may cause radio interference or whose operation can be affected by this interference.

On 1.1.1996 the EMC Directive came into force Europe-wide - all new electrical and electronic devices traded within the EU must comply with these conditions.

As an outward sign of compliance with all EU-relevant laws (EMC act and other design principles) devices must display the CE conformity symbol.

Enclosure requirements

Enclosures in themselves are not covered by the EMC legislation as they are not by definition electrical or electronic devices.

Enclosures are however largely responsible for the strength of radiation emissions and/or interference (outgoing or incoming interference) of a device. The enclosure material is also a decisive factor in the screening effect, which is the combined reflection and absorption damping properties of an enclosure.

Plastics alone have no filtering effect in the case of radio interference. Screening characteristics can be achieved with additional expensive treatments (metal vaporisation or the application of a conductive coating).

Metal enclosures on the other hand offer a highly effective basic protection against radio interference without any further treatment. Large surface area contact of individual enclosure parts (cover, enclosure sections) is an important factor in this.

Where special safety requirements exist, EMC compatibility can be increased by

- conductive seals,
- contact-uninsulated ends and
- EMC-compliant cable connections.
